Bottles, extra wide mouth, round with screw cap

Glass, clear, with black urea screw cap

These bottles are specially suited for dry chemicals and specimens of all descriptions, but can also be used for liquids. The wide opening enables bottles to be filled conveniently and safely with powders, pastes, granulates and liquids.

- Good chemical and physical properties
- For use in applications that are not associated with high thermal loads
- Stable and tough

| Capacity (ml) | Pk | Cat. No. |
|---------------|----|----------|
| 60 | 20 | 215-2191 |
| 120 | 20 | 215-1919 |
| 250 | 10 | 215-2189 |
| 500 | 10 | 215-2190 |

Laboratory bottles, wide mouth, with GLS 80 screw cap

DURAN Group

DURAN®, borosilicate glass, clear, with screw caps

Round, with graduation and specially developed GLS 80 thread. Opening and closing the bottle is easy with quick closure mechanism. The 80 mm wide opening enables bottles to be filled conveniently and safely with powders, pastes, granulates and liquids, and emptied as well. Spoons, spatulas and tweezers can be used for handling substances easily and confidently. The large opening can accommodate even large volume funnels securely and easily.

- Very good chemical resistance, high temperature resistance
- Extra wide opening allows uncomplicated, easy cleaning
- Minimal thermal expansion giving relatively high resistance to temperature changes

With printed retrace code (batch identification); batch certificate available at www.duran-group.com
