

Aluminium foil discs

Pure aluminium, 99,0 - 99,5%

Can be used for a wide variety of laboratory tasks.

- Economical large packs
- Tissue paper is inserted between discs to facilitate handling
- Simple storage and removal from dispenser

Thickness (µm)	Ø (mm)	Pk	Cat. No.
30	80	1.000	611-9001
30	130	1.000	611-9004

Sealing films, cling film

Cling film stretches in all directions, made of clear plastic. Can be used for sealing tubes, beakers, flasks and bottles. Clings well to glass, ceramics and stainless steel, but will not cling heavily to itself.

- Odourless, moisture-proof
- High tensile strength and puncture resistant

Delivery information: Rolls supplied in a dispenser box.

Length (m)	Width (mm)	Pk	Cat. No.

Sealing film for manual application, PARAFIL® M
Brand

Universal, semi-transparent, highly elastic film designed for airtight and moisture-proof sealing and many other applications. The film can be stretched up to 200% and forms a completely tight seal even with irregular shapes and areas.

- Resistant to polar substances such as saline solutions, inorganic acids and alkalis for up to 48 hours
- Effective temperature range -45 to +50 °C (melting point ca. +60 °C)
- Liquid-tight and gas permeable
- Non toxic, free of plasticisers

Length (m)	Width (mm)	Pk	Cat. No.
