Draining rack, wall mounted Kartell

PS, white

With integral extra wide draining channel and 72 draining rods which are 95 mm long, 15 mm Ø. The rod insertion apertures are closed at the back. This prevents water from seeping into the wall.

- The draining rods can be inserted and replaced as required
- Supplied complete with drainage tube and fixtures for wall mounting
- Optional rods for narrow-necked vessels are available to order under article number 212-6109

Draining racks, benchtop

PVC rack, PP rods

The stable rods are individually placed into the holes of the draining rack and are clicked into place. Their positions can be changed at any time. Using a combination of rods of three different lengths (60 mm, 100 mm and extension to 150 mm), the draining rack can be adapted to any apparatus which is to be dried.

- Stable bench top rack, can use both sides
- Rods are simply clicked into place
- Collecting pan can be easily removed for emptying
