

## Erlenmeyer flasks, narrow or wide mouth, with beaded rim DURAN Group

### DURAN®, borosilicate glass, clear

Volume graduations and labelling area.

- Very good chemical resistance
- High temperature resistance
- Minimal thermal expansion, giving relatively high resistance to temperature changes

With printed retrace code (batch identification); batch certificate available at [www.duran-group.com](http://www.duran-group.com) (214-1102 and 214-1152 without retrace code)

ISO 1773 narrow mouth (except 214-1107/214-1108 and 214-1112)

DIN ISO 24450 wide mouth (except 214-1152 and 214-1168)

## Erlenmeyer flasks, narrow or wide mouth, Super Duty DURAN Group

### DURAN®, borosilicate glass, clear

With easy to read graduations and a white labelling area. Higher mechanical stability compared to standard Erlenmeyer flasks due to increased wall thickness and reinforced sturdy rim and base. Even distribution of wall thickness. It is recommended to heat the super duty Erlenmeyer flasks slowly and evenly, to prevent thermal stresses in the glass.

- Very good chemical resistance
- High temperature resistance
- Minimal thermal expansion, giving relatively high resistance to temperature changes

With printed retrace code (batch identification); batch certificate available at [www.duran-group.com](http://www.duran-group.com)
