

Jars, low form, with Twist-off thread

Clear glass, without cap

Perfect for sample collection, storing and transporting of powders, granulates, pastes or liquids.

- Good chemical and physical properties
- For use in applications without high thermal loads
- Fitting metal screw caps are available under codes 216-3630 to 216-3633

Laboratory bottles, wide mouth, with GLS 80® thread

DURAN Group

DURAN®, borosilicate glass, clear, without screw caps and pouring rings

Round, with graduations and specially developed GLS 80 thread. Opening and closing the bottle is easy with quick closure mechanism. The 80 mm wide outer diameter of the bottle neck permits easy filling and pouring out of powders and viscous substances. The large opening can accommodate even large volume funnels and gives easy access to scoops or spatulas.

- Easy-to-read scale and large labelling field for easy marking, in fired-on, highly durable white ceramic. Very good chemical resistance, high temperature resistance
- Special thread means opening takes less than a turn
- Service temperature limit of standard blue closure and pouring ring (must be ordered separately): +140 °C
- USP standard

With printed retrace code (batch identification); batch certificate available at www.duran-group.com
