

Pasteur Pipettes

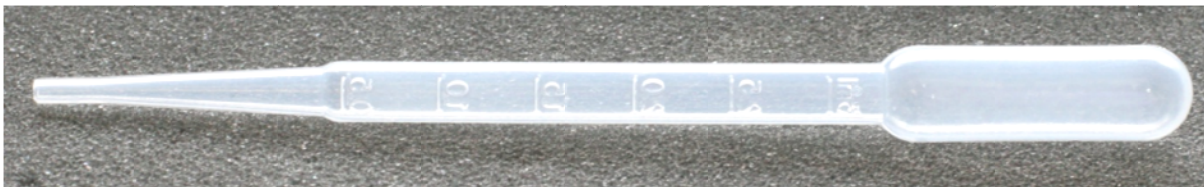

The RLS range of disposable transfer (Pasteur) pipettes is convenient for a variety of liquid handling tasks when precise measurement is not needed. The pipettes are made with virgin soft polyethylene and are unbreakable, freezable, and heat sealable. Polyethylene is a translucent plastic which is chemically resistant, pliable and easy to view your sample. These are not autoclavable.

Suitable for use in most laboratory applications, some are graduated. Sterile versions are also available in 10's, 20's and individually wrapped. The standard packaging is a white box with a lid that opens on the top.

1ml Graduated (0.25ml), 15cm long, Capacity 5ml, Bulb Draw 3ml, 500 per box			
Non Sterile	Sterile Bags 10	Sterile Bags 20	Sterile Ind/Wrapped
6-11001	6-11002	6-11003	6-11004

3ml Graduated (0.5ml), 15cm long, Capacity 7ml, Bulb Draw 3ml, 500 per box			
Non Sterile	Sterile Bags 10	Sterile Bags 20	Sterile Ind/Wrapped
