

Test tubes without rim

AR-Glas®, soda-lime glass

The economical, proven alternative in an economy size pack. Wall thickness approximately 0,8 to 1,0 mm.

- Good chemical and physical properties
- Can also be used as disposable test tubes

Length (mm)	Ø ext. (mm)	Pk	Cat. No.

Test tubes with rim, light wall

Soda-lime glass

Soda-lime glass test tubes are suitable for general mixing and simple laboratory work, and will withstand moderate warming (e.g. in a water bath). They should not be placed directly into naked flames.

Length (mm)	Ø ext. (mm)	Wall thickness (mm)	Pk	Cat. No.
50	6,5	0,45	250	212-7076
50	10	0,6	250	212-7077

150	18	0,6	100	212-7083
150	24	0,8	50	212-7084

Test tubes without rim, medium wall

Soda-lime glass, rimless

For a variety of uses. Ideal for bacteriological applications.

- Good chemical and physical properties
- Use in applications that do not involve high thermal stresses
- Medium-walled
