

Multiwell cell culture plates, Standard Line

Clear PS, sterile and certified non pyrogenic

VWR Collection multiwell plates are vacuum gas plasma treated for consistent cell attachment and growth.

- Well volume uniformity ensures uniform growth surface area exposure
- Raised rims on wells and condensation rings on the lid reduce evaporation and minimise edge effects
- Single position lid reduces misplacement and the risk of contamination
- Wells with alphanumeric code for easy identification

Manufactured in 100 000 grade cleanroom environment.

Packaging: Individually wrapped in peel-to-open paper/plastic blister packs.

| No. of wells | Culture area (cm ²) | Recommended working volume (ml) | Well volume (ml) | Pk | Cat. No. |
|--------------|---------------------------------|---------------------------------|------------------|-----|----------|
| 6 | 9,6 | 1,90 - 2,90 | 17,0 | 100 | 734-2323 |
| 12 | 3,85 | 0,76 - 1,14 | 6,80 | 100 | 734-2324 |
| 24 | 1,93 | 0,38 - 0,57 | 3,50 | 100 | 734-2325 |
| 48 | 0,84 | 0,19 - 0,29 | 1,55 | 100 | 734-2326 |
| 96 F | 0,33 | 0,075 - 0,20 | 0,39 | 100 | 734-2327 |
| 96 U | 0,32 | 0,075 - 0,20 | 0,32 | 100 | 734-2328 |

Recommended working volume (ml) = per well

Multiwell cell culture plates, Falcon® Corning®

PS, sterile, non-pyrogenic

All tissue culture treatments render polystyrene hydrophilic and result in the incorporation of a variety of anionic functional groups that support cell culture. To ensure reproducible results and conditions, all Falcon® tissue culture treatment is performed in a vacuum chamber.

Corning® Primaria™ tissue culture treatment additionally incorporates nitrogen-containing functional groups that have been shown to improve attachment and spreading of some cell types.

Non-treated plates have a more hydrophobic surface and show reduced cell attachment.

- Labyrinth lid, condensation rings, and deep well design control contamination, reduce evaporation, and minimise edge effects
- Reliable vacuum-gas plasma tissue culture treatment provides well-to-well and plate-to-plate consistency
- Convenient, peel-open packaging
- Individual and Ready-Stack (RS) trays are PET (Code 1) and recyclable

Colour: Clear

| Description | Culture area (cm ²) | Volume (ml) | Sterile | Packed | Pk | Cat. No. |
|---------------------------------------|---------------------------------|-------------|---------|------------|-----|----------|
