

Test tube racks, Unwire™, Nalgene® Thermo Scientific

ResMer™, colour coded

The ResMer™ manufacturing technology improves the shelf life of these test tube racks under the harshest conditions such as autoclaving, cleaning in dishwashers, chemical disinfection and use in freezing conditions. They are unmistakable with durable and brighter colours. The racks do not float, so they are also very suitable for use in ice or water baths.

- Heat resistant up to +135 °C, autoclavable
- Half size, so more space saving than conventional racks
- Good chemical resistance

Test tube racks, Unwire™, Nalgene® Thermo Scientific

PP, coloured

These racks hold a full load of tubes securely in position. They do not float in the water bath.

- Heat resistant up to +135 °C, not autoclavable
- Racks can be stacked when empty
- Very good chemical resistance
