

Plastic Test Tubes

Test Tubes are precision moulded from premium grade Polystyrene, for optical clarity and Polypropylene for all-round chemical resistance and extreme temperatures.

- Sizes - External Rim Diameter: 6mm to 17mm
Length: 50mm to 125mm
- Chemical free inert materials minimises contamination risk.
- Tube dimensions and lot-to-lot uniformity are continuously monitored by stringent quality control checks.
- Impact strength is enhanced by wall thickness.
- Round bottom for easy sample removal.

Plastic Test Tubes - up to 17mm Outer Diameter

Sterile Test Tubes

Sterile Test / Culture Tubes are irradiated in hermetically sealed packaging.

- Come in single wrap packs or in trays of 25 or 125.
- Irradiated and tested in accordance with AAMI Guidelines; lot-to-lot traceability of every product.
- Polystyrene provides best optical clarity. Polypropylene provides chemical resistance. Both materials are biologically inert and chemical free.
- Sizes - External Rim Diameter: 12mm and 17mm
Length: 75mm and 100mm
