

## Adhesive PCR foil seals

These soft non permeable 38 µm thick aluminium foils with strong medical grade adhesive eliminate the need for heat-sealing devices or mats during thermal cycling. Compared to other aluminium foils, these foils have less tendency to roll back on themselves when removing the backing paper and fit well to the plate during application. Sterile product is packaged in tamper evident bags of 25/bag.

- Recommended for temperatures from –80 to +120 °C
- Easily pierceable with pipette tips and robotic probes
- Excellent vapour barrier, virtually no sample evaporation
- Certified free from DNase, RNase and nuclease

Each foil LxD: 142,9×82,6 mm with sufficient sealing area for all PCR plates.

Length with end-tabs removed: 125,4 mm.
